Cono

The book consists of forty-five contributions classified by subject. It is called morphology since it aims at analysing the shape and form of objects, and it is mathematical in the sense that the analysis is based on set theory, topology, lattice algebra, random functions, etc. It demonstrates a wide range of topics suited to the morphological approach. Unable to display preview. Download preview PDF. Mathematical morphology (MM) is a theory for the analysis of spatial structures. This process is experimental and the keywords may be updated as the learning algorithm improves. MM is not only a theory, but also a powerful image analysis technique. The purpose of the present book is to provide the image analysis community with a snapshot of current theoretical and applied developments of MM. This is a preview of subscription content, access via your institution. It is called 'Morphology' since it aims at analysing the shape and form of objects.
